

To: The House of Representatives

You only fight Discrimination & Racism, with a quality mark

Mandate a quality label against discrimination and racism, by independent third parties. To this end, Fyjas is launching this citizens' initiative, supported by Article 1 of the Constitution.

Unions, governments, players, clubs, public, educational institutions, health care workers, employers, etc. must be able to trust that within all institutions, for example in professional soccer, everything is done to make them racism-, and discrimination-free. So that players, students, employees, parents, trainers and others involved live in a racism and discrimination safe environment. This is only possible if those institutions are accredited or certified and the certificates & reports deliver what they promise. Neutral and objectively determined from independence

Report national discrimination figures 2022- RVO

Artikel 1 Gelijke behandeling en discriminatieverbod, Nederlandse Grondwet.

All who are in the Netherlands are treated equally in equal cases. Discrimination based on religion, belief, political opinion, race, gender, disability, sexual orientation or on any other basis is not allowed

Why is it important?

Racism and discrimination is a major problem both nationally and internationally. Not acting or not acting effectively is not an option. The charter diversity, for example, does not work because it is too non-committal. Now it is important to solve the discrimination and racism problem consistently and systematically. After years of research reports have shown this. The government is pursuing a stronger approach, the appointment of the National Coordinator for Discrimination and Racism and the Government Commissioner for Sexual Transgressive Behavior and Sexual Violence, a Minister for Poverty Reduction and Legal Protection are some examples.

Discrimination and racism have led to surcharge affair, ethnic profiling, anti-Semitism, sexism and racism in sports, media, education, government and semi-public bodies, houses of worship (research ANBI status and Nashville declaration), police (see documentary the blue family), internship discrimination, educational discrimination, employment discrimination, housing discrimination and so on. Discrimination, racism and exclusion should be banished totally. Let's replace it with a more inclusive society, where humanity, justice and equality are paramount.

Sign, share and support our petition so that we can bring this citizen initiative to the House of Representatives around the November 22, 2023 elections!
